disk filtration followed  
by the advanced EctoSys®  
disinfection technology

Capacity: ..... 750/1,500 m³/h

Delivery: ..... Oct 2012 - Sept 2013

» The business relationship of Bocimar and RWO has existed for several years. During that time we have always been satisfied with the excellent quality and high technological standards of their products. The offer of a highly engineered system for treating ballast water was certainly well considered and we finally found RWO's CleanBallast® technology to be the very best choice.«
