

Measuring Cell Calibration Service

Oil Monitor Device

Competence

- RWO is authorized by the manufacturer to calibrate and check the measuring cells of the oil monitor device
- As the worldwide leading manufacturer of Oily Water Separators RWO is able to offer a quick and reliable exchange process for the OMD's type 2005, 24, 11, 21
- To ensure continuous OWS operation during calibration time of your measurement cell a substitute device can be provided

Background

As required by IMO Resolution MEPC.107(49) the accuracy of the 15/5 ppm bilge alarm measurement cell has to be checked, calibrated and repaired if necessary, **at IOPP Certificate renewal survey (5 years interval)**, according to the manufacturer's instructions.

This check can only be carried out by an **authorized company**. Alternatively the unit can be replaced by a calibrated device.

The provided calibration certificate of 15/5 ppm bilge alarm measurement cell indicates the last service date and has to remain on board for PSC inspection purpose.

Please notice, that although the type OMD 11 and 21 are not produce any longer, but we still offer repair service and maintenance for it.

Bilge water separator type OWS-COM 5

5 steps measurement cell exchange program

No interruption for your daily operation

1

Receipt of your order for measurement cell calibration including:

- Your invoice address
